Some order to produce a desired effect. This system

V. A detailed, sufficient explanation of the reasons, qualifications, proprietary rights or unique capabilities of the prospective contractor that makes the prospective contractor the ONLY source capable of providing the required professional service, service, construction or item(s) of tangible personal property. (Please do not state the source is the "best" source or the "least costly" source. Those factors do not justify a "sole source.")

This is the only source found in research with the ability to remotely deploy the gas and heat sourced munitions in a designated area, remotely without risk of fire to structures and property. Potential for reducing damage to structures and costs associated with damage caused during tactical deployments. Also provides access to barricaded subjects without risk to team members by exposing them to areas controlled by armed subjects.

VI. Provide a detailed, sufficient explanation of how the professional service, service, construction or item(s) of tangible personal property is/are unique and how this uniqueness is substantially related to the intended purpose of the contract.

The robot is provided with a full one year warranty, and instruction provided by manufacture for basic maintenance. Robot designed to quickly replace any of three main compnents quickly to reduce any down time should the device be damaged during an incident. The robot is lightweight steel construction with all electronics sealed within the steel body to prevent being easily disabled.

VII. Explain why other similar professional services, services, construction or item(s) of tangible personal property *cannot* meet the intended purpose of the contract.

Have not been able to find mobile root with similar deployment capabilities to

communicate, climb, and deploy munitions and give live video feed during incident.

VIII. Provide a narrative description of the procedures used by the department to justify due diligence in determining the basis for the procurement, including procedures used to conduct a review of available sources, such as researching trade publications, industry newsletters and the internet; reviewing telephone books, and other advertisements; contacting similar service providers; and reviewing the City of Clovis vendor list.

This purchase is being made possible though grant funding. As part of process, all procedures have been followed to conduct research, and provide information related to the potential use, and training for deployment and use of robot. New Policy in development for agency as well. Research was conducted via internet search engines for tactical robots. This included size for deployment ease and capabilities.

IX. A list of all businesses contacted (do not state that no other businesses were contacted), date of contact, method of contact (telephone, mail, e-mail, other), and documentation demonstrating and explanation of why those businesses could not or would not, under any circumstances, perform the contract or provide goods; or an explanation of why the department and/or school has determined that no businesses other than the prospective contractor can perform the contract.

Transcend Tactical. No others had equal abilities listed to meet needs.
